**МОСКОВСКИЙ ГОСУДАРСТВЕННЫЙ УНИВЕРСИТЕТ
имени М.В. ЛОМОНОСОВА**

ОЛИМПИАДНАЯ РАБОТА

Наименование олимпиады школьников: **«Ломоносов»**

Профиль олимпиады: **Английский язык**

ФИО участника олимпиады: **Адеева Ксения Леонидовна**

Класс: **11**

Технический балл: **93**

Дата проведения: **05 марта 2022 года**

Двок 1.

a.

1. False - only Aleksandr Nevsky was elected prince of Novgorod.
2. False - Aleksandr Nevsky has won battles against Swedish invaders and Germans.
3. True - Edward I had to be married to Queen Eleanor and Aleksandr Nevsky was married to Prince of Polotsk's daughter.
4. True - Edward I had to master his anger to become a great leader.
5. Not stated
6. False - Both Edward I and Aleksandr Nevsky have shown willingness and ability to negotiate.
7. True - Aleksandr Nevsky changed the principle of rule in Novgorod.
8. True - Both Aleksandr Nevsky and Edward I have implemented new laws.

15

B.

It was a magnificent morning at the royal palace. The sun was shining blissfully through the windows. Henry VIII thought it was going to be an ordinary day until he saw a letter outside his room.

The letter stated that his queen, Anne Boleyn, was being held for ransom. The thieves had their eyes on the untold riches inherited by Henry and threatened to kill the queen if the riches weren't brought by the end of the day. And so Henry decided went to the spot where the thieves were, disguised as a guard. He gave the thieves the bag with the riches and they released Anne.

However, Henry was done with anticipation and revealed himself. The look of betrayal was clear on the thieves' faces and they returned the riches. Henry VIII saved the queen.

Duck 2.

A: Hello, everyone. We gathered here today to discuss a topic of science and its trends in the present and the past. Our guest is Mikhail Bulgakov, an exceptional USSR writer whose books were not well received by the public when they were created. However, nowadays millions of readers adore his masterpieces. His books and stories belong to the social realist movement that was the most widespread movement in the 1920s-1930s.

A: Hello, Mikhail ^{Aphanasievich}, we are glad to have you here with us.

B: Hello, everyone. I'm glad & happy to be here too.

A: So what got you interested in this topic that made you accept our offer and have a talk with us?

B: Well, science is a fascinating thing. Scientific discoveries have made lives of many people easier and have provided knowledge about countless processes. However, not all of them have a positive outcome. Some of them might be rather destructive, damaging or simply unethical. You just have to know when you're crossing the line.

A: And when do you think that happens?

B: I believe ~~it occurs~~ one of the cases is when scientists try to create something that looks or acts human.

Back in my day, all sorts of mutations have been a ~~popular~~ widespread trend in science.

A: I recall you have described ~~to~~ this trend in ~~your~~ one of your books.

B: Yes. And the main point I've tried to make is that you can't create something similar to a human being through mutations. The creature that is manufactured that way lacks the most important quality of all — humanity. Sure, Shavik might have looked or acted human.

But his feelings were that of an animal.

A: I do agree with that point. Nothing ~~can~~ amount of ~~the~~ experiments can result in creating something that might have a wide variety of ~~feelings~~ that a human being has.

B: But do you have people attempting to do something similar in your time period?

A: Yes, ~~we~~ Well, the history is a cycle that ~~it~~ always repeats itself. We do have scientists ~~who~~ who are trying to create robots that could act human. And some of ~~them~~ ^{these machines} even ~~do~~ have the ability to "think" ~~x~~ and hold a conversation. We call it artificial intelligence.

B: That sounds both fascinating and ~~scary~~ ^{terrifying}.

A: That's because it is. Many people have expressed their fear of the machines becoming too advanced and replacing humans because of the efficiency and productivity that the robots possess.

B: It's crazy how determined the scientists are at doing something that is so unethical.

A: Yes, ~~they seem to~~ ^{nowadays} ~~current~~ scientists ~~seem~~ to have the same idea in ~~their~~ mind. The only difference is the approach. Do you ~~thing~~ think ~~that~~ experimenting

B: ~~In my opinion,~~ on machines is a bit less cruel than on animals?

B: Yes, but that is the only good side I see to this.

A: After getting to know one of the most popular scientific trends nowadays what do you think happens next? Where do things go from here? What changes might the future bring?

4.

Учреждение.

4.

B: It can go two ways. ~~Either way~~ People could either realise that what they are doing might cause do more harm than good or they might get too carried away. and

A: I see eye to eye with you ~~about~~ I would also like to add that even if artificial intelligence fails to become as similar to a human being as possible, Scientists will still try to find new ways of creating a "person". However, I believe that ~~other scientific discoveries~~ if Scientists focus on improving the lives of human beings that already exist, i.e. on us, the world would become a better place.

B: Definitely.

A: ~~It's~~ It's time to end the interview. ~~Thank~~ Mikhail Aphanasievich, thank you for being with us. It was a pleasure to meet you.

B: Thank you for ~~insist~~ inviting me to your talk. Goodbye!

A: Goodbye, Mikhail Aphanasievich!

Science

- Writer/poet, country and hist. period, lit. movement
- Similarities/differences in the trends of past and present
- Examples from books

A: Hello, everyone. We gathered here today to discuss a topic of science. Our quest is ~~and trends and tendencies~~ that ~~and its~~ trends in the present and in the past. Our quest is of (phonasy) Bulgakov, the an exceptional ^{19th} writer, whose books were not well received by the public when they were created, ~~in~~ but ^{however} millions of readers adore his masterpieces. His books and stories belong to the social realism movement that was the most widespread and popular movement in the 1920s - 1930s. Many of these books depict that time period quite vividly. Hello, Aphonasy (...), we are happy to have you here with us.

B: Hello, dear everyone. I'm glad to be here too.

A: So, ..., what got you interested in this topic to make that made you accept our offer and have a talk with us.

B: Well, science is a fascinating thing. It ~~was~~ scientific discoveries have made the lives of many people easier and have provided knowledge about ~~many~~ countless processes. However, not all of them have a positive effect on people's outcome. Some of them might be rather destructive, damaging or simply unethical. You just have to know when you're crossing the line. Sometimes people want to create something

A: And when do you think that happens?

B: I believe, it occurs when scientists try to create something that looks or acts human.

7. um um

Deeee

A: I recall the "Yquibuck."

8.

A: I recall you have described a similar case in your book "A dog's heart".

B: Yes. ~~But~~ the main point I've tried to make is that you can't create something similar to a human being ~~artificially~~ through mutations. ~~The~~ The creature that is manufactured that way lacks the most important quality of all - humanity. Sure, Shavick might ^{have} looked human or acted human. But his feelings were that of an animal.

A: I do. I agree with that point.
