B. Many years ago the kingdom of Gwynedfedd was reigned by Queen dily. After inheriting ~~the~~ the throne from her father, a ~~belliferent~~ ~~king~~ ~~Harry~~, she came into untold riches, allowing her Royal Highness live a magnificent life. Having been residing in a shantri-la, the mettle and devotion to the nation of ~~king Harry~~ ^{her father} never wavered in her. Once, king John of the neighbouring kingdom had his eyes on succumbing Gwynedfedd. Even though the rulers got along famously, the Queen was in anticipation of a betrayal. Despite being threatened with the death, she mobilised the army to save her people. dily was ~~(imprisoned)~~ imprisoned by John's soldiers but she never gave in fighting. ~~even within the chamber.~~ ~~She~~ She sighed blissfully as the news about Gwynedfedd's victory spread across. ~~She was proud of her people.~~ The war was over.

Book 2

Interviewer: Greetings to everyone! Today's issue is going to be dedicated to scientific trends of nowadays and ~~two centuries ago~~ in the eighteenth century. To keep the track of progress we've invited Mary Shelley, a British writer, a representative of the movement of romanticism and an author of a spectacular oeuvre "Frankenstein". Good morning, Mrs Shelley!

Shelley: Glad to meet you!

Interviewer: Have you already taken stock of the contemporary scientific achievements?

Shelley: Frankly speaking, I was utterly bewildered to get to know about the existence of a machine, containing the answer to any question, the progress of a medical science to cure a number of deadly diseases, ^{and} the opportunity to reach any geographical spot by air.

Interviewer: Could you conjecture that these introductions are feasible?

Shelley: Absolutely not. Back in my era it was possible by no stretch of imagination. We couldn't even think that carriages ~~would~~ ^{would} be substituted by automobiles, books could easily be replaced by computers, the death rate could be reduced and people wouldn't need to harness candles anymore.

Interviewer: That's true! An endless quantity of life aspects can hardly be recognized since the end of your period. As a creator of "Frankenstein" you did try to foretell the future. Could you please share your predictions?

Yuemobuk

Shelley: Actually, staying in this advanced world, I find many links to my opus. People are ~~striving to~~ breathing life in metal contrivances, striving to make them more human as well as Mr. Frankenstein in my book. The professor gave life to this creature but didn't manage to instill cultural values in him. In effect, the Frankenstein wretch ~~has been~~ was willing to be equal to to ~~to~~ God-created human beings which wasn't feasible from the word go. What I intend is that today ~~the~~ people shall not lose control over machines to avoid a disaster.

Interviewer: Thank you for this invaluable piece of advice! Please tell us, what, in your view, will humanity achieve in the upcoming future?

Shelley: I believe that to this date people have reached the summit, however, there is always room for improvement. I presume it'd be rational for humanity to focus on eradication of ecological ills and implement all existing technologies into clearing the planet.

Interviewer: Thank you, Mrs Shelley! Personally, I root for your position as well for not only environment and animals suffer from these tribulations but humans themselves. It was a pleasure to ~~take~~ talk to you!

Shelley: Likewise!

1. ~~It's not~~ The details of how Edward ascended the throne are not crystal clear in the text. Edward ascended the throne by succeeding his father Henry, whereas Aleksandr Nevsky was selected by the nation.

2. Edward I ~~re~~ several times reinforced his debt military gift by succeeding Wales and successful campaign against Scotland. Likewise, Aleksandr proved to be a warrior by bringing to an end the Swedish and German invasions.

3. Edward was wedded to Queen Eleanor and Aleksandr's wife was the daughter of Polotsk Prince.

4. It was Edward who had to suppress his irascible character ~~and~~ to ~~become~~ obtain poise and patience in his affairs.

5. Edward ~~has~~ eliminated the drawbacks of his character and demonstrated his capability of settling a negotiation. Aleksander put his best foot forward to defend his nation against the Khan, so he was a gifted collaborator.

7. Alexander ~~altered~~ the imposed institutional sovereignty in place of the personal one.

8. Edward made an appreciable contribution to state by strengthening the crown by implementing several laws and defining the English common law.

Aleksandr continued to promulgate laws to salvage Russia from Mongol horde.

2. Once, ^{many years ago} in the kingdom of Gwynedd, ~~there~~ was, by ^{the} ~~the~~ noble,

Queen Lilioukatia reigned. After inheriting her throne from her father, a belligerent King Harry, she ^{came into} ~~possessed~~ untold riches, allowing ~~the~~ ^{her} royal house ~~get along~~ famously ~~with~~ ^{her} highness live a magnificent life. Despite having ~~been~~ ^{been} residing in a shangri-la, she the mettle and ~~set~~ ^{dedication} devotion to the nation of her father never wavered in her. Once, ~~the~~ King John had his eyes on ~~the~~ ^{at the} neighbouring kingdom

Gwynedd. Even though, the rulers got along famously, the Queen was in anticipation of betrayal. Despite being threatened with death, she mobilised ~~an~~ ^{the} army to save her people. ~~she was seized by King John's soldiers eventually and coerced to sign the resignation & act imprisoned.~~ Lilioukatia sighed blissfully, knowing that ~~she still had~~ She sighed blissfully as the news about Gwynedd's victory spread across. She was proud of her people.
