- 4 One of them had to work hard at his character. - True
Edward's character has changed dramatically during his reign.
- 5 Neither of them enjoyed the responsibility for their countries. - Not Stated
Not stated.
- 6 Only one of the leaders was a great negotiator. - False
Edward I was a patient negotiator. Aleksandr Nevsky collaborated with the Khan of Mongol yokee to save his ~~own~~ ^{lands} own ~~country~~.
- 7 One of the leaders changed the way his country was governed. - True
Aleksandr Nevsky ~~changed~~ reformed Novgorod sovereignty.
- 8 Both leaders contributed to the development of the legislation in their countries. - True

Aleksandr Nevsky reformed Novgorod sovereignty.

Edward I reformed English law and was called ~~the~~ "English Justiciar".

Microbeem N2 Rap N 5

A long time ago there lived King Edward the Magnificent. He inherited the Kingdom with its untold riches from father. Edward was a wise and sagacious unlike his ~~treacherous~~ treacherous brother Henry, who had his eye on the royal crown.

One day Henry threatened the royal chef and made him to poison the king's ~~drink~~ ^{soup}. The servant was hungry and took a sip of it. Blissfully waiting, Henry was in anticipation until someone put a bowl of soup in front of him. Edward asked ~~Henry~~ why Henry wasn't eating. At that moment the servant fell down dead. The betrayal was revealed. ~~Edward was saved by pure chance.~~

~~It was the chef's trickery.~~

Edward was saved by pure chance. It was the chef's trickery. Henry was imprisoned.

~~I am glad to welcome Stanislaw Lem to our studio.~~
УПОТРЕБКА N 3 БОРИС

I: I am glad to welcome Stanislaw Lem to our studio. Stanislaw Herman Lem is a famous Polish science fiction writer ~~who was working~~ who represents literary futurology and criticism of XX century. Mr. Lem, could you please tell me what excites you most in the XXI century?

SL: Well, you know, ... I'm in awe of how many discoveries and inventions ~~made~~ scientists have made in recent years. I compare the present with my books and I must admit that in 1961, when I wrote "Solaris", I couldn't even imagine that a man would go to the moon, split the atom, create Internet...

I: What are the similarities and what are the differences between the XX and the XXI centuries, Mr. Lem?

SL: Oh, that's a good question. I'd like to say that the level of technological development, the level of knowledge and capabilities have increased. ~~But~~ we ~~still~~ are still dreaming about traveling around the Univers, we still do not understand our native Earth nature. ~~That's actually~~ This is actually what "Solaris" is about. People can not understand the Ocean, can not ~~for~~ understand its essence. The same thing about Earth. ~~The~~ Science has changed but people remains as they were.

I: You are right, it's hard to disagree. Then what about the ecology. Bionomics is attracting more and more ~~attention~~ attention of scientists.

↓

Guidance by Papers

SL: This is true. I suppose it's one of the most important trends in modern science. Clifford Simak, Frank Herbert Jr. and even Isaac Asimov have already predicted it in their novels. Eco-friendly elaboration is the future of modern science. Anticipating the future, what exactly is my job, I think that the mankind will either learn to be a part of the biosphere and live in harmony with the nature or continue to destroy the planet, ~~leading to the death~~ which will lead to the death of billions. Science must make the right choice and direct humanity along the right path, choose the right vector and make efforts.

I: Thank you very much for your opinion. I completely agree with you. Such a forecast makes it profitable to invest in the "green industry" and develop in this direction. States should reform environmental legislation...

SL: Laws don't matter as much as human perception of nature. The Earth abounds in natural resources, there are unique conditions that allow life to exist. We ~~too~~ must save it. And only science can save it. Common efforts will surely lead to the desired result. I believe in it.

I: Our time is running out. I want to thank you again for your visit, ~~and for such and~~ I am sure our listeners liked our conversation. ~~Goodbye!~~

SL: Thank you too!

I: Goodbye!

SL: Goodbye.

A long time ago there lived ~~the~~ King Edward, the Magnificent. He interested ^{with its untold riches} the Kingdom of France. Charles III. Edward was a wise ^{and} sagacious ~~man~~ unlike his brother Henry, who had his eye on the royal crown ^{and made him} ~~42~~ ^{treacherous} ~~42~~ ^{this}

One day Henry ~~put~~ ^{threatened} the royal chef to poison ~~some~~ ^{the} dish ~~for~~ ^{him}. The chef ~~initially refused~~ ^{but} Henry threatened to kill him, ~~and so~~ ^{was} ~~agreed~~ ^{hungry}. The servant ~~who~~ ^{was} ~~carried~~ ^{it} ~~the~~ ^{poisoned} soup ~~was~~ ^{was} hungry and took a ~~big~~ ^{sip} of the ~~poisoned~~ ^{poisoned} soup while ~~carrying~~ ^{sitting} it. Henry was sitting at the same table ~~with the king~~ ^{sitting near the king and} blissfully waiting ~~for~~ ^{Henry was} in anticipation until ~~the~~ ^{someone} servant put a bowl of soup in front of him. Edward asked why Henry didn't eat. At that ~~very~~ ^{moment} the servant fell down dead. The betrayal was revealed ~~and~~ ^{Henry} ~~Edward~~ ^{Edward} was saved by pure chance. ⁵⁰

The chef confessed to having ordered the servant to bring soup to Henry. ^{If} ~~Henry~~ ^{was} ~~Henry~~ ^{the} ~~chef's~~ ^{trickery} ~~Henry~~ ^{was} imprisoned, and ~~the~~ ^{the} ~~chef~~ ^{was} ~~was~~ ^{executed}. ⁷¹

$$42 + 35 + 22 + 30 + 26 = 163$$

$$77 + 30 = 107 + 38 = 145$$

$$130$$
