Book 1

A

1. Not stated
2. False. It was mentioned, that Alexandre Nevsky won many battles.
3. True. Edward I was married to Queen Eleanor and Alexandr Nevsky-
to the Prince of Polotsk's daughter.
4. True. Edward I had to learn to contain his anger and to admire
justice
5. Not stated
6. False. Edward I was able to negotiate patiently, Alexandre Nevsky was
willing to collaborate with other rulers, for example, and did it successfully.
7. True. In Novgorod, the citizens used to select and invite rulers themselves.
This concept was called personal sovereignty. It changed when Alexandr's son
Vasily began to rule and Alexandr tried to rule through him.
8. Not stated

B

Once upon a time, king Tristan of Larendell decided, that it was high time his only daughter Primrose got married. He had already had his eyes on a candidate - a prince from another kingdom's royal family. Primrose objected, so he threatened to not let her inherit the country's untold riches, and she obeyed.

On the day of the wedding, however, Primrose ran away. She simply couldn't forgive her father's betrayal. She traded the opportunity to live blissfully in a magnificent palace for survival in the wild, where nobody could save her. The king waited in anticipation for Primrose to return. Unfortunately, no one has seen the princess ever since.

Book 2

Interviewer:

Good afternoon, ladies and gentlemen, and welcome to my show. Our guest today is Kir Bulychev - a prominent Russian science fiction ~~writer~~ writer and critic. We've met today in order to discuss the current trends in science. However, before we begin, ~~I have~~ I would like to ask one question. Mr. Bulychev, do you mind if I address you by your real name, Igor Vsevolodovich, instead of your nom de plume?

Igor Vsevolodovich:

No, I don't mind, thank you for asking.

Interviewer:

Alright, now we can start. Igor Vsevolodovich, you were born in 1934, so the prevalent historic period in your life was the second half of the ~~twentieth century~~ twentieth century. Has ~~it~~ this fact influenced the genre

Memobuk 2
of your works?

Igor Vsevolodovich:

Well, I have always been interested in science fiction, so, I believe I would have chosen this genre even if I had lived in a different period of time. However, it ~~has~~ certainly impacted ~~particular~~ scientific theories affected the ~~the~~ subjects I addressed in my stories, particularly the especially the scientific theories on which the plot was based. For example, in the 1960s, the ^{scientific} world was consumed with the idea of space exploration. That's when I published my first book about Alisa Selezneva, where the girl encounters aliens. Of course, at the time, everyone wondered if ~~the~~ life existed beyond our planet, and I was not an exception. Unfortunately, I ~~see now~~ ^{suppose} that scientists haven't made much progress on that front.

Interviewer:

Well, that's not entirely true. Nowadays we know much more about the universe than ever before. Even though we ~~haven't discovered any forms of life on other planets~~, no forms of life have been discovered on other planets yet, the researchers aren't giving up. In fact, several exo-planets were recently found by NASA, ~~that~~ ^{living} that could potentially harbor ~~the~~ favorable conditions for development of ~~the~~ ^{living} organisms. As you can see, this domain still attracts our attention.

Igor Vsevolodovich:

I'm glad ~~that~~ to hear that, and the discovery you mentioned is undeniably impressive. Nevertheless, I can't help but wonder: are scientists still attempting to make time-travelling possible? ~~It's~~ This concept truly fascinates me, I even ~~mentioned~~ wrote about it in 'A million adventures', so I'm not indifferent towards its future.

Interviewer:

I regret to inform you, that this time the modern world will, probably, not live up to your expectations. Generally speaking, it's still not possible to go back in time or travel to the future. However, we may soon be able to do it virtually! A great number of ~~max~~ equipment and software has been designed to ~~enhance the experience of those~~ ~~make virtual~~ virtual worlds as realistic as possible, so, I believe, soon it won't be necessary to use a time machine in order to try and live in different eras.

Yucmobox 3

Igor Vsevolodovich.

I see. Well, judging by what you've told me, humanity has certainly made progress in the scientific domain, and I ~~believe~~ am firmly convinced that you haven't reached the limit yet. I am sure that even greater discoveries are ~~about~~ yet to be made.

Interviewer:

I agree with you, thank you for having faith in us and thank you for being here today.

Igor Vsevolodovich:

The pleasure is all mine!

Тепробук 1

Book 1 A

1. Not stated. It is not ~~described how~~ mentioned in the text whether the people wanted Henry Edward I to rule or not.
2. False, It is said that Alexander ^{Newsky} won ~~a num~~ ^{many} great number of battles
3. True. Edward I was married to Queen Eleanore and Alexander Newsky to the ~~daughter~~ ^{and} prince of Polotsk's daughter.
4. True. Edward I had to learn to contain his anger ^{to admire} justice, he also managed to become more patient and generous.
5. Not stated (?)
6. False. It is mentioned that Henry Edward I was able to negotiate patiently and that Alexander Newsky was also willing to collaborate with other rulers, for example, and did it successfully
7. True. Alexander Newsky's son Vasily ~~cont~~ ruled Novgorod after him, and Alexander ^{Newsky} ~~invited~~ used to invite rulers themselves. However, Alexander ^{Newsky} ~~changed~~ that when he ~~continued~~ ^{began} ruled through his son, thus establishing institutional sovereignty.
8. Not stated

B

- royal
- magnificent
- untold riches
- inherit
- have one's eyes on sth
- anticipation
- betrayal
- threaten
- save
- blissfully

Once upon a time, there existed a kingdom of Larendell. It was ruled by king Tristan, ^{who and} had ^{only one} daughter named -

Queen Beatrice. They also had ^{Princess} Primrose. 26 ^{Tristan} of Larendell

One day, the king decided that it was ^{high} time for his ^{only} daughter ^{Primrose} to get married. He had already had his eyes on a suitable candidate - a prince from a nearby kingdom's royal family. When he ^{Primrose} ~~told Primrose about this [arrangement], she refused to obey.~~ He insisted, that it was the only way for the princess to inherit their country's ^{untold} riches and ^{threatened} to disown (go) her. She ran away in tears.

Later, when it was time for dinner, he called Primrose and waited in ^{anticipation} for her to arrive, but she didn't. He realised immediately that she had run away. She couldn't forgive her father's ^{betrayal}. She traded the opportunity to live ^{blissfully} in the magnificent palace for survival in the wild, where nobody could save her.

Упражнение 2

Once upon a time, King Tristan of Larendell decided, that it was high time his only daughter Primrose got married. He had ^{already had} his eyes on a ~~candidate~~ prince from another kingdom's royal family. Primrose objected, so he threatened to not let her inherit the country's untold riches. [if ~~it~~ unless she obeyed].

On the day of the wedding, Primrose ran away. She simply couldn't forgive her father's betrayal. She traded the opportunity to live blissfully in a magnificent palace for survival in the wild, where nobody could save her. The king waited in anticipation for Primrose to come back, ~~yet she never returned.~~ ~~no one~~ ~~no one~~ ~~no one~~ had seen the princess ever since.

BOOK 2

119 words

- years when lived 1934-2003
- literary movement science fiction / critic
- book names A Million Adventures, (abb. Alice Selezneva)
