ЧУСТОБУК 1

A.

10

1. False; Edward I was by no means elected.
2. False; Aleksandr Nevsky won a lot of major battles. Edward I ^{demonstrated} ~~showed~~ great military skills as well.
3. True; Edward I was married to Queen Eleanor. Aleksandr Nevsky married a few years after he had been invited to Novgorod.
4. T; Edward had to master his temper.
5. NS
6. T Nevsky was able to make a deal with the Khan. Edward I ~~was~~ could negotiate patiently, however, it does not mean that his skills were remarkable.
7. T; Nevsky altered the foundation of rule in Novgorod.
8. T; Edward was called "English Justinian" for his contribution to the country's legislature. Aleksandr Nevsky promulgated laws.

B.

THE ~~A~~ THREATENED TO THE CROWN

After a magnificent ball, Her Royal Majesty Margaret York returned to her castle and found a letter on her table. It was written by her brother, Prince William.

He wanted to inform her that one of the barons had been preparing a betrayal. The cruel man had his eye on the throne as he wanted his son to inherit the Crown.

Queen Margaret ran out of the castle to meet William. By the time she had reached his fortress, she told him 'Brother, you saved me! You are worth untold riches!' He hugged her and said that his fortress was safe enough for the anticipation of the revolt ~~in~~ more or less blissfully.

AN INTERVIEW WITH AGATHA CHRISTIE

Interviewer: Without doubt, the person sitting next to me needs no introduction. She is the world's renowned writer of the 20th century, the author of such literary masterpieces as DEATH ON THE NILE, HICKORY WICKORY DOCK, THE MURDER ON THE ORIENT EXPRESS and many others. Being extremely successful in writing detective novels, this British author is often referred to as THE QUEEN OF CRIME. Agatha Christie, good evening and thank you for sharing your precious time to discuss current trends in science.

Agatha Christie: Good evening. Thank you for having me, it is a pleasure.

Interviewer: It is common knowledge that nowadays young people are eager to be involved in various scientific projects. Was it the same in your age?

Agatha Christie: No, I wouldn't say that science was particularly popular among young people back then. You see, in the first half of the 20th century ~~were~~ adolescents were more keen on dancing ^{and} driving automobiles. ~~and~~ Although, I must say that I ~~des~~ in HICKORY WICKORY DOCK I ~~descrip~~ describe a couple of youngsters who are willing to pursue a scientific career.

Quercus 4

Interviewer: Interesting! However, if I am not mistaken, whenever Hercule Poirot ~~or~~ needs ~~med~~ a medical assistant, ~~he is always~~ ~~he~~ there is ~~not~~ no one younger than 40 to help him with a case, right?

Agatha Christie: It is true. Surely, medicine is an essential part of science, and, ~~I~~ as I have already mentioned, it was not the subject of ~~y~~ the ^{youth's} ~~youth's~~ interest. What is more, ~~during those~~ it was impossible to become a successful and respectable medical assistant ^{in one's 20s} ~~during~~ those years. Frankly, I ~~do not~~ ^{don't} think that it is different in the 21st century.

Interviewer: I see, fair enough. Actually, because of the recent pandemic, the majority of scientific projects now are connected with medicine. Is it justified from your point of view?

Agatha Christie: Absolutely. Medicine is a way to save people, so it should be the main interest of scientists. ~~It was because~~ A lot of Hercule Poirot's cases were solved with the help of doctors, DEATH ON THE NILE for instance.

Interviewer: True! The novel is my favourite. ~~Many~~ ^{The future} ~~people~~ prospects of science development is a question of heated debates. Personally, I believe that in future science will ~~more~~ focus on space. What's your view?

Agatha Christie: That's a great question. To tell you the truth, I am sure that future scientists will work on robots who will be able to solve all sorts of crimes.

Уастроук 5

Interviewer: Marvellous! Thank you very much, it was a great ~~disc~~ discussion. Goodbye!

Agatha Christie: ~~Indeed, I'm~~ Thank you, goodbye.
