1. After World War Two the term teenager became more distinct. An average teenager was more likely to graduate from high school and fulfill their own wishes. Generally, teenagers gained more freedom and independence.
2. The concept of a teenager is used in commerce because after teenagers get more freedom and could express their wishes, it became obvious that teenagers have what it takes to become influencers and bring profit.
3. While both Text 1 and Text 2 are about adolescence, they tend to focus on different aspects of it. Text 1 gives the reader some ideas on the history of adolescence and the term teenager, while Text 2

Чистовик

provides examples of teenagers achieving great things in life at a young age. Furthermore, Text 1 does not focus on exact people, while Text 2 certainly does by telling the story of William Hewlett, David Packard and ~~the~~ Bill Gates.

4. Text 2 puts forward the idea that some teenagers create marvelous opportunities for themselves. While I cannot completely disagree with this idea, given that Bill Gates was indeed formulating his strategy in his teens as the text says. However, usually teenagers who come up with such ideas do not do so on their own, their parents or teachers help them. That is why I can only partly agree with the aforementioned statement.

5. I find the examples in Text 2 truly inspirational, as they show that even at a young age, when you are just a mere adolescent, it is possible to come up with something grand. Learning about Hewlett and Packard founding their

company in their 20s makes me
inspired to try even harder to
achieve my own goals. (8)

Information sheet.

Planning London Trip.

1. London is full of museums and galleries, but first and foremost we should visit the museum of Victoria and Albert, where you can get acquainted with the most famous works of British artists and purchase nice souvenirs.
2. As for historical landmarks, we should definitely visit the Buckingham Palace, which is the residence of the royal family. The Tower of London is also worth visiting, as we will be able to see ~~with our own~~ ~~the~~ the place where a lot of ~~well-known~~ infamous prisoners, including Anne Boleyn,

Уставок

4. In order to reach all our destinations in time and with the utmost convenience, we should stick to using the tube, wich is fast and not that costly.
5. As we will eat out ~~the~~ practically every day of our trip, I think we will be able to savour most of the British cuisine. While we are in London, we should ~~be~~ definitely try ~~the~~ drinking afternoon tea and having a proper English breakfast. Furthermore, I suggest we try ~~a~~ trifle, a traditional desert which many find to be the most delectable.

Book 5.

Dear editor,

I have seen your invitation to comment on the article about the production of plastic and the problem with the plastic waste and decided to participate. ^{I am going to} state my opinion and put forward some ideas on how to solve the problem. The problem ~~is~~ stated in the aforementioned article is how should we cope with plastic waste which comes with the acceleration of the synthetic plastics production and would removing all plastics

Усгубук

from our lives be the salvation. In my opinion, our life without plastic would change drastically and getting rid of it completely would bring nothing but chaos. Therefore, we should look for ~~another~~ measures, such as trying to recycle more of the disused plastic products.

First of all, we cannot get rid of all the plastics, because it would cause major inconveniences to practically every person in every field of work. For example, how could plastic be substituted in ~~the~~ electrical appliances? It is also hard to imagine dealing without plastic in modern design and architecture. ~~It goes~~ ^{saying} without ~~mentioning~~ ^{that} that all the latest inventions ~~which~~ ^{that} require intricate work are often made using 3d-printers which work with plastics. Therefore, harsh measures ~~such~~ such as trying to stop using plastics at all would not help in making the relationship with it

Устойчив
more sustainable.

Another factor that is totally not in the favour of abandoning plastic is that by stopping ~~the~~ its usage we would slow down the technical and scientific progress of the humanity. After all, using plastic ~~is~~ is not only about ^{the} excessive packaging, it also means being able to explore the unknown, venture into the depths of the ocean and get closer to the other planets. New technological advances may not always be the best for our planet, but we should try to find the perfect balance between shutting them down completely and going overboard in our desire to learn more.

~~The~~ main But what could help us in preserving the riches of the Earth and fighting against the plastic waste if not the complete removal of all plastics? The solution is quite simple: we need to collect plastic and recycle it. These two ideas could do all the work: collecting the disused plastic would prevent it from spreading across the globe and polluting our planet; recycling would in its turn reduce the amount of

методик

plastic that simply goes to waste and give it a second life. This way we will be able to ~~both~~ stop the perpetual pollution and continue using all the modern appliances.

In conclusion, the idea I am trying to put forward with this commentary is ~~that~~ that the best way to solve the ~~problem~~ ^{the problem} with plastic production and usage is to collect and recycle plastic. There is no need to stop using plastic, but we should ~~not~~ address the issue somehow.

It was a pleasure giving a commentary on this article. I am looking forward to your reply.

Yours truly,
Emil Richter
