Reading Бнок 2

1. The personality of an average Western adolescent became more valuable to others. It was no longer a popular opinion that teens are obliged to serve their elder kin. Moreover, adults started to adhere to the needs and wishes of those younger. Thus, teenagers were viewed as a separate social group. 2

2. The notion of the adolescent or a teenager gave way to huge marketing profits. An agglomeration of new commodities, trends and fashions and colossal marketing campaign to promote those were definitely a boon to the businessmen. ~~Having~~ With a new social group one devises an abundance of goods allegedly suitable for its members and make them pay through the nose. 2

3. The texts ~~draw~~ draw on completely different aspects of teenage years and adolescence. Text 1 explores the origin of the term "teenager" and its consequences, whereas Text 2 provides the examples of successful youngsters. 2

4. I find the quote from the first text quite plausible. Having thought about it for a while, the notion of teenager is exploited by CEOs and magnates. A mammoth number of toys, clothes and accessories are being promoted to teenagers, although they are all show and no go. The ~~writer~~ writer who noted such tendency in 1958 seems to be a soothsayer to me. 1

5. I do find the provided examples inspirational. These people are vessels of bravery. Adolescents should aspire to be as ambitious as them and contribute to their future from an early age.

Planning London Trip

Historical Landmarks

- 1 First and foremost, a visit to the Tower of London is an absolute must since its remarkable historical background and the opportunity to learn about the legendary ravens and the beefeaters first-hand. In addition, an excursion to Westminster Abbey will dazzle us with interesting facts about the most prominent writers, let alone the fact that we could learn about Britain's first Norman king, William the Conqueror.
- 1 Even a fleeting visit to Buckingham Palace is bound to leave a favourable impression ~~as~~ not only because of the fact that it is a royal residence,

but also since everything is on the most lavish scale there.

A guided tour to the Houses of Parliament would be an experience of a lifetime both because the political system of the UK is peculiar and the story of ^{the} Gunpowder Plot is ~~extremely~~ gripping. In addition, I would strongly recommend to visit the numerous churches London boasts to learn about Sir Christopher Wren's masterpieces, ~~the~~ the Fire of 1666 during Charles II reign and, obviously, the establishment of the Church of England by Henry VIII.

For admirers of Sherlock Holmes, both from the book and the latest BBC interpretation, I advise to ~~visit~~ take a stroll down Baker Street.

Activities

It will be a crime not to visit the West End theatre's performances as many of us are huge fans of British actors as Benedict Cumberbatch, ~~and Tom Hiddleston~~ who may well feature in "Hamlet" once again, and Tom Hiddleston.

For those who love feeling on top of the world London offers the world-famous London Eye — an ~~immense~~ immense observation wheel in the city centre.

Food As for the authentic meals,

~~we absolutely have to have~~ we absolutely have to have our afternoon tea with scones and cucumber sandwiches, let alone trying out Yorkshire pudding as a part of English breakfast.

Transport

Dear Sir/Madam,

With due respect, I am writing to elaborate on the content of the recently published article. The main problem raised in the text is connected with the omnipresence of such extremely environmentally harmful material as plastic. To be candid, the provided ~~a~~ facts make the situation appear alarming. ~~It~~ Nevertheless, if certain precautions are taken, the ecological situation is bound to change for the better.

When it comes to the reasons for such dire state of the ~~eco~~ ecology, it should be stressed that the proportion of plastic being produced is rapidly increasing. To be more precise, since the production of plastic commenced, it has increased every year, which should be taken into consideration. ~~For instance,~~ Thus, in 1950 the produced plastic estimated 2 million tonnes, whereas in 2015 it was 380 millions.

Moreover, the ubiquity of plastic ~~is~~ could be due to the reliance of humans on this material. Not only is it used in plastic bags, packages and bottles, but it ~~also~~ is also widely used in construction of buildings, ~~production~~ ~~of~~ technology, production of commodities of any kind. This results in the fact that

a complete suspencion is impossible and the presence of plastic particles even in ~~Antarctic~~ Antarctic sea ice and the abbyssal depths of ~~the~~ oceans.

To cushion the blow on the environment an agglomeration of recommendations should be taken into account. Firstly, the policy concerning game parks and nature reserves could be altered. If more of these are created ~~across the globe~~ and the sanctions for polluting ~~the~~ nature there are made a lot more severe, flora and fauna ~~will~~ will drastically change and start to thrive in a few years.

Additionally, it is possible to combat the reliance ~~on~~ on plastic. This can be done in several strides. The officials can both promote environmentally-friendly lifestyle and going green among ~~people~~ people and pass a legislation which would curb the use of plastic ~~in~~ in production. Should the global community aspire to lead a ~~lifestyle~~ sustainable lifestyle, the Earth will be a lot less contaminated. When using plastic is nearly impossible due to economic reasons, ~~there~~ there will be nothing to further compound the problem. To

conclude, it is my firm conviction that with the ~~assistance of global community~~, cooperation of global ~~com~~ community and the mentioned points taken into consideration ~~we~~ We have every chance to enhance the life on Earth by ~~not~~ hindering the process of poisoning it with plastic.
