1. In terms of biology, physical and mental functions are in their prime during the teenage years, thus, being significantly enhanced. Moreover, it was discovered that adolescents possess a remarkable resiliency, which assists them in boosting their mood and getting over failures much faster. 1/2
3. Text 1 and Text 2 do not focus on similar aspects of ~~the~~ adolescence. Text 1 elaborates upon the advantages and virtues of the teenage period. However, text 2, on the living, working, and educational standards adolescents were supposed to meet in different periods of the past. 2
4. It is claimed in the text that teenagers allegedly possess a built-in resiliency, which allows them to easily overcome obstacles and find something positive in the negative circumstances. Speaking frankly, I can't concur with the aforementioned statement. In fact, adolescents oftentimes get discouraged. This impedes them from attaining success ~~or~~ lack of self-confidence or ~~not~~ merely doubts about their capacity to achieve their goals is indeed a hurdle for them. In addition, ~~adolescents~~ teenagers are often too apprehensive about the outcome of ~~part~~ some particular events or even competitions. Therefore, they ~~hard~~ are prone to underestimating themselves and tend to emphasize the negative aspects rather than consider the positive ones. 2
2. In order to answer this question, we should take into account the severe circumstances adolescents had to face back in the day. They needed to support and contribute to their family's income. Hence, they had no other option than to commence working earlier. Alas, those were the ~~real~~ living standards they ~~are~~ were ought to meet. 1/2

5. Indubitably, there are many opportunities nowadays for teenagers not to sacrifice their education in order to be independent. As our world is developing and flourishing, the living standards are becoming higher and education policies are embraced by families ~~from~~ from many countries regardless of their geographical residence. Hence, adolescents are encouraged to devote more time to their education than before. 2

Task 4.

Planning London Trip

Museums and galleries

It is common knowledge that London is one of those cities which encompass a ~~plethora~~ ^{many} different museums and galleries such as the British Museum, Victor and Albert Museum, the National History Museum, and all of them are world-wide recognized by people from different countries. Therefore, London attracts a plethora of people each year and we are no exception.

Historical landmarks

London has a ~~rich~~ diverse culture and a rich history. One of the most outstanding sights ~~we ought to visit~~ ^{we ought to visit} ~~are~~ is the ~~the~~ Buckingham Palace which is the King's official residence, and we would be ^{indeed} very lucky to encounter ~~the~~ King Charles III there. The Windsor Castle which belonged to ~~the~~ the England's beloved Queen Elizabeth II ~~is also~~ should also be included in our list. I reckon it is indeed a ~~supercalifragilisticexpialidocious~~ idea to stroll down the Westminster Abbey. ~~and enjoy the~~ ~~Tower Bridge~~ ~~views~~ and watch Queen Camilla's coronation ceremony ~~thereafter~~, thereafter, we could enjoy the ~~views~~ ~~the~~ picturesque views from the Tower Bridge.

Events

~~Although~~ We could indisputably stroll ~~down~~ ^{near} the Parliament in order ~~to~~ to have a glance ~~at~~ the House of Lords and the House of Commons elections. ~~And~~ I am strongly convinced that attending the West End and Hyde Park would ~~boost our mood~~ contribute to boosting our mood.

Transport

~~As~~ As our time is limited and we'll still need to attend lots of magnificent places, I suggest using a rapid-transit London Underground and the eminent Tube in order to get everywhere on time.

Food ^{perceive}
 In order to ~~get~~ the so-called London vibe and satisfy ourselves, it would indubitably be a good idea to taste the famous Toad-in-the-Hole, Shepherd's pie, the Sunday Roast and top it all with the clotted cream.

Subject: Reducing the number of airplane flights

To whom it may concern,

I am writing in regard to the article that was recently published on the ecological forum. It elaborated upon the target of reducing global warming by the virtue of diminishing the number of airplane flights. The consequences of carbon dioxide emissions are indeed severe. ~~They~~ They do not only disrupt the life of plants and animals but also have an inferior impact on people. In addition, these affect climate change which is indisputably crucial.

It is common knowledge that as our world is developing, more ~~and more~~ natural resources are used ^{manufactured} in order to keep up with the process, people resort to ~~the use of~~ using plants. However, little ~~they~~ they do they realise the damage they are eventually causing to the planet. Thousands of polar bears and other animals ~~are being~~ suffer due to being left without the habitat they are used to. The likelihood of floods all across the world is increasing, thus threatening the millions of people living ~~in~~ near the coast.

There are many factors that can contribute to the climate change. Unfortunately, we are in no possession of resources that would repair all the damage people ~~caused~~ were causing for the last 50 decades. However, there is actually something we are able to do in order to improve the current situation. It is estimated that a transatlantic round-trip flight ~~releases~~ ^{on average} releases as much carbon dioxide as the yearly emissions of one person in India. Therefore, if we reduce the number of our airplane flights, we would greatly improve the current circumstances.

The possible solutions are to organize virtual meetings, use trains instead of planes and encourage our acquaintances to do the same.

In conclusion, I am strongly convinced that if we follow the aforementioned rules, we'll improve the situation, and reduce the carbon dioxide emissions

1. In terms of biology, physical and mental functions of their bodies are in their prime, thus, being significantly enhanced in such period of their life. Moreover, it has been discovered that adolescents possess a remarkable resilience, which assists them in boosting their mood and getting over ~~the~~ failures ^{much} faster.
2. In order to answer this question, we should take into account the severe circumstances the adolescents had to face back in the day. ~~Mostly, they~~ They ~~had~~ needed to support ~~their family's income~~ and contribute ~~to~~ and contribute to their family's ~~own~~ income. ~~They, Adam~~ Therefore, had no other option than to ~~work~~ start working earlier in order to do so. Furthermore, these were the living standards they had to meet back then.
3. Text 1 and Text 2 do not focus on similar aspects of adolescence. Text 1 elaborates upon the advantages and virtues adolescents gain when they reach their teenage period. In contrast, Text 2 focuses on the ~~living standards, educational policies, and other working~~ living and working standards they had to meet in different periods of the past.

4. It is claimed in the text that teenagers ^{allegedly} have a remarkable built-in resiliency, which allows them to overcome ^{allegedly} ~~crisis~~ hurdles and find something positive in negative ~~things~~ circumstances. I ~~can't~~ ^{merely} can't concur with the aforementioned statement. ^{Speaking frankly}
- ~~Of~~ In fact, adolescents can oftentimes ~~get~~ ^{get} discouraged from ~~overcoming~~ ^{overcoming} particular obstacles ~~and reaching the unprecedented heights~~. Lack of self-confidence or merely doubts about their capacity can impede them from reaching the unprecedented heights.
- In addition, many times an oft teenagers are being too ergo apprehensive about the outcome of a particular event, ~~therefore~~ they tend to ~~be~~ emphasize the negative aspects rather than consider the positive ones.
5. Indubitably, ~~it is said~~ there are many opportunities nowadays for teenagers ~~to become independent~~ and not sacrifice their education in order to be independent. As our world is developing, the living standards became higher and education policies altered, thus, enabling
