2. Teenagers are those who are able to spread fashions. This fact allows companies to make more money.
3. The texts draw our attention to different aspects of adolescence. The first one focuses more on the general information about teenagers, while the second text provides us with various examples of successful adolescents.
4. In the first text it is stated that teenagers are able to spread fashions. I totally agree with the statement. For instance, when a new game appears, a number of adolescents almost immediately find out about it. It probably results from the fact that teenagers interact with one another closer than adults.
5. I do think that the people in the second text are great because they were able to make a name for themselves by dint of their own effort and hard work.

Dear editor,
~~I~~ I am writing to you to suggest various solutions to the problem raised in ~~the~~ ^{your} article. It is stated that ~~pl~~ plastic is of concern to our world. I also think it is dangerous, and we should try to tackle the issue.

To begin with, plastic waste is ~~believed~~ believed to reduce the biodiversity of our world. A number of animals tend to suffer since they consider plastic to ~~be~~ be their food. Therefore, plastic waste is a threat.

To continue with, it makes air more polluted. When plastic is burnt, it emits chemicals which are really dangerous. For instance,

a number of people are forced to spend more money in order to stay ^{because of it} healthy. Moreover, their lives might be shortened. Thus, it is of vital ~~import~~ importance to take this problem into ~~consideration~~ ~~con~~ consideration and try to tackle it.

Firstly, one of the probable solutions might be introducing more materials that can be recycled ^{and replace plastic}. Secondly, we should encourage various governments to enact new legislation requiring everyone to follow strict rules in terms of plastic usage. For example, ~~various~~ different factories ^{should} ~~might~~ ~~be forced~~ ^{should} be forced to use less plastic. People might ~~be~~ be notified of the right way to use it.

In ~~conclusion~~ ^{conclusion}, plastic waste makes it harder to maintain the biodiversity of our world. In addition, people tend to suffer from some ~~chemicals~~ ^{chemicals} which are emitted while burning plastic. Therefore, plastic ^{may} ~~might~~ be really dangerous, and we should try to solve the problem. It might be done by means of enacting ~~new~~ ^{new} legislation and introducing more material which ^{can} ~~can~~ ~~be~~ ~~good~~ substitutes for plastic.
