Four hundred years of Roman Invasion made a great influence on the British Isles. Even today we see straight roads and strong walls built by the romans together with some architectural monuments. Also, the British took up some cultural traditions: they wore roman clothes, visited theatres, baths. What's more, Britons spoke latin and were able to read and write in it. Finally, the Romans brought Christianity - the main religion in Britain up to this day.

Great Barrier Reef - It is a site of...

This unique site is home to many endangered species, and its existence enables scientists to explore the wildlife in its untouched beauty and gives these creatures a chance to conserve their population.

Historic District of Old Québec - This place was

founded by...

Such places are extremely important to preserve, for they help people get a step closer to the fascinating understanding of what human life and culture used to be many centuries ago.

Yellowstone National Park - The vast natural

site covers...

This enormous wildlife reserve is an amazing example of a huge number of natural sites within one territory and is of special interest to those investigating into the peculiarities of our planet.

Palace of Westminster and Westminster Abbey -

The structure, rebuilt from the...

Not only is this structure a magnificent example of Gothic architecture, it has some sacred atmosphere - astonishing to think realise, this place has seen all British monarchs since a thousand years ago time.

Sydney Opera House - Inaugurated in 1973, the site...

Architectural monuments such as the Opera House, which is a combination of innovative forms and spectacular landscape areas, represent a step forward in the development of human art and culture.

Book 5

Museums are an important part of human culture. They preserve ^{special} certain items which help ordinary people to learn about the history of a certain place, monument or person. There are many museums in every part of the world, each of them just waiting to be discovered. But to get a full picture of the human culture development it isn't enough to get acquainted with the museum collections of your country only. Every nation has its own unique traditions, and the world's cultural heritage altogether is

extremely vibrant. So visiting museums in different places allows you to find interconnections between different cultures, which may become the key to understand a certain period in history.

A special activity, known as museum sleepovers, has recently become quite popular in different museums around the world. In my opinion, spending a night at a museum hall will be an unforgettable experience for every teenager, not only because of all the interesting activities such type of events has to offer, but also for the deep plunge into the cultural atmosphere every visitor is sure to take. The organisation aspects of such sleepovers will undoubtedly be comfortable for both children and parents, because they are usually held on the night between the two weekend days, so they wouldn't be an obstacle for work or school.

There are many museum sleepovers for people interested in different cultures. Perhaps, one of the most breathtaking and fun experience would be a night at the State Museum of Fine Arts (also known as the Pushkin Museum) in Moscow, Russia. The sleepover called "The Secrets of Ancient Egypt" is an amazing experience for children from ten to fifteen years. Adults can enter, too, but the main audience would be the younger guests. During

(9.11)

the sleepover, its participants will be able not only to see some of the most precious items of the museum's Egyptian collection, but to try making a real sheet of papyrus using paper stripes, flour and water. Other activities include trying to read the ancient hieroglyphic texts and even writing a few sentences using the hieroglyphs yourself! Another great part of the event will be the feast with different foods and drinks. Last, but not least, during the sleep there will be a VR-technology in use, which will make the ceiling of the gallery turn into a starry sky, and the floor into a real desert. The entrance costs 500 roubles per one participant. The event starts at eight o'clock p.m. on the 5 second of May 2024.

525.

The influence of Roman Empire on the British Isles: 60-70 marks

- 1) straight roads, strong walls, houses
- 2) culture - clothes, theatre, baths
- 3) new language - latin
- 4) read & write in latin
- 5) christianity
