The Roman Empire brought an army to Britain in order to occupy their territory. The Romans succeeded, so Britain was part of the Roman Empire for some time. ~~The Roman soldiers~~ Later on, the Roman soldiers attacked 3 of the most important British cities. As a result of this action, British people started to live like Romans, for example, they started learning Latin and became Christians.

• Historic District of old Québec - This place was founded by.

• In my opinion, it is important to protect this district, because it ~~shows the~~ is the sign of a good relationship between North America and France.

• Sydney Opera House - Inaugurated in 1973, the site.

• From my point of view, the protection of this architectural work is very important, because it shows the creativity of modern architects.

• Yellowstone National Park - The vast natural site covers.

• I think that preserving this National Park is necessary, because it's a place full of wildlife habitat and a home for many animals.

• Palace of Westminster and Westminster Abbey -
The structure, rebuilt from the

* As far as I am concerned, we must preserve this structure, ~~because~~ as it is a rare sign of medieval remains.

• Great Barrier Reef - It is a site of

As for me, the importance of the preservation of this site can be explained by the fact, that it has many coral reefs, which are rare nowadays.

Nowadays, museums play a huge role in modern society. In fact, statistic researchers show that the average human visits around two museums a year. This is very good, as it is extremely important to not only know the local history and culture, but the foreign one as well. This knowledge widens your horizons and helps you understand the mentality of other countries.

As museums are not only important for adults, but for children as well. The London's British Museum decided to offer ^{children} ~~kids~~ a sleep-over, where they can learn many new facts about ancient Greece. In my opinion, this is a very good idea and I would also

be glad to visit this sleepover, because I am a huge enthusiast of Greek history. But unfortunately I won't be able to do it, because according to the advertisement, this sleepover is made for 8-14-year-olds.

Talking about the organisation of this sleepover I have to say, that everything is very convenient. However, I think the event is a bit too short. I would rather prefer staying for the whole weekend at this wonderful museum.

Now I would like to propose my own marvelous sleepover event at the German Dinosaur Museum. ~~It will~~ The sleepover will be called "Dinos in the wild". The event will be suited for all ages, the only mandatory thing is that you have to be a fan of Dinosaurs. During this sleepover you will first of all have a huge excursion around the museum, where all your questions will be ~~at~~ answered. Later on, you will be given the chance to play the game "Ark: Survival Evolved" in virtual reality, in order to experience the true atmosphere of Dinosaurs. Last but not least, we will be frying Dino-nuggets and enjoying

all together our Dinosaur-themed meal.

All in all, I have to say that visiting all kinds of museums is extremely advantageous for your own mental development. That's why I would recommend everyone to visit the museum sleepovers, which are not only useful, but fun as well!
