Тема 5.

Museums are very important for the modern world-wide ~~cult~~ culture. It is also necessary to know the world's history because you may need it in the future.

~~As for~~ In my opinion, the theme of the activity is pretty interesting, but not many children like museums nowadays, all they do is gaze in their phones all day long. As for the name of this activity, I don't think it's the best choice there is because it doesn't exactly explain what we will be doing there. Not many people of my age would go here, they're more interested in playing video games - in conclusion, doing unproductive stuff, but personally I would go there, I find the theme and activities very fun.

The learning aspect of such activities is learning the culture of other countries ~~and~~ in general. I would recommend this museum to my friends that might find the activities interesting. The most interesting activity, in my opinion, is the storytelling. ~~You can see~~ You can find out about their culture easier this way, because stories are an important aspect of culture in general.
